

CYS380: Network Protocols & Architecture
Practical Handouts 23BSCYS
Spring-2026

Student Roll No: 23BSCYS006

Instructor Signature: _____

Submitted to: Engr: Saqib Hussain

BACHELOR OF SCIENCE IN CYBER SECURITY

DEPARTMENT OF TELECOMMUNICATION ENGINEERING

MEHRAN UNIVERSITY OF ENGINEERING AND TECHNOLOGY, JAMSHORO

Lab Rubrics

S.no	Title	Lab Performance Indicators			Score
		Subject Knowledge	Data Analysis & Interpretation	Ability to conduct experiment	
1	Introduction to Basic IP Networking				
2	Getting Started with Router Configuration				
3	Getting Familiar with LACP				
4	Understanding GVRP and Its Configuration				
5	Fundamentals of VLAN One-Arm Routing				
6	Hands-on with VLAN Routing				
7	Implementing Point-to-Point Protocol on Serial Interfaces				
8	Introduction to HDLC and PPP				
9	Configuring PPP Authentication with PAP and CHAP				
10	Configuring Frame Relay				
11	Configuring PPPoE				
12	Introduction to Static NAT				
13	Exploring Dynamic NAT				
14	Hands-On: Easy IP				
15	Getting Familiar with ACL				
16	(Open Ended lab): To make use of networking concepts, design a real-world application.
